1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. This application is in condition for allowance except for the presence of claim 8 directed to an invention non-elected without traverse. Accordingly:

Claim 8 has been cancelled.

3. The following is an examiner's statement of reasons for allowance:

a) The prior art does not disclose or suggest a shape memory alloy comprising 23-27% Al, 39-45% Co, and 28-38% Ni (all in atomic %), and comprising a β -phase and 5-50% by volume γ -phase, at least 40% by area of crystal grain boundaries of the β -phase occupied by the γ -phase, and having a tensile strength of 400-1100 MPa and shape recovery of 18% or more.

b) With regard to previously applied prior art, the Declarations by Professor Oikawa dated September 27, 2007 and October 9, 2007 provide evidence that the materials disclosed in the Oikawa APL article would not possess the tensile strength and/or the γ -phase area ratio required by the instant claims. Further, the examiner agrees that the JP '273 reference provides no disclosure from which one of skill in the art would be able to derive materials having a combination of composition, microstructure, and properties as required by the instant claims. To achieve the claimed materials from the JP '273 disclosure would be far beyond routine

optimization normally done in the art, but rather would involve a substantial amount of undue experimentation in an inherently unpredictable field.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
